

REAL-WORLD SERVICE ACCESS

Make the call *that matters.*

Openline verifies what is actually available by phone, then gives people the evidence to decide what happens next.

EVIDENCE BEFORE CONFIDENCE

THE WEB IS NOT THE GROUND TRUTH

Service information changes faster than directories.

A listing can say “open” while the coordinator says “we’re full.” For someone who needs help today, that gap is not a minor inconvenience—it is a missed opportunity.

LISTING · 42 DAYS OLD

Harbor Food Hub

- Open today · 9:00–17:00

PHONE · CURRENT

“We’re full today.”

The answer that changes what someone should do next.

THE GAP

Openline verifies the difference.

Fact first. Confidence second.

A QUESTION BECOMES EVIDENCE

Start with the question, not the answer.

Openline turns a real-world service need into a phone workflow a person can inspect from beginning to end.

01 · REQUEST

Describe

Need, country, timing, language, household size, and access constraints.

02 · REVIEW

Preview

See the providers and the exact questions Openline wants to ask.

03 · APPROVE

Decide

A human approves before the live execution boundary is crossed.

04 · EVIDENCE

Act

Receive confirmed, unavailable, uncertain, and follow-up outcomes.

→ The phone work is prepared before the phone work begins.

INSPECTABLE BEFORE EXECUTION

Nothing is hidden before the call.

1

Every question is visible.

Providers see a clear, bounded purpose—not an open-ended conversation.

2

Approval is explicit.

The user chooses whether the plan is allowed to run.

3

Simulation comes first.

The complete request-to-evidence flow works without placing a real call.

The screenshot shows a web application window titled "openline / workspace" with a "simulation mode" indicator in the top right. The main content area has a header "02 · REVIEW CALL PLAN" and a large heading "These are the calls Openline wants to make." Below this, there are two call plan entries. The first entry, "Harbor Food Hub", is highlighted with an orange background and includes a list of three questions: "Are you accepting new households?", "Are you open during the requested time?", and "What requirements apply?". A "PREVIEW" button is located to the right of the questions. The second entry, "Mission Community Pantry", is highlighted with a blue background and also has a "PREVIEW" button to its right. A progress indicator at the bottom shows "04 / 06" with a green line segment under the "04" position.

openline / workspace simulation mode

02 · REVIEW CALL PLAN

These are the calls Openline wants to make.

Harbor Food Hub

- Are you accepting new households?
- Are you open during the requested time?
- What requirements apply?

Mission Community Pantry

04 / 06

EVIDENCE BEFORE CONFIDENCE

Truthful outcomes, not false certainty.

Openline returns a record someone can review—
not a single green checkmark that hides what
happened.

CONFIRMED

Available today

Accepting new households. Open until 5:00 PM.
English supported.

UNAVAILABLE

Full today

No new households during the requested window.
Recheck tomorrow.

FOLLOW UP

Evidence incomplete

Voicemail reached. Openline says what is still
unknown.

Person
